Brainstorm

Vol. 10 No. 9

## Announcements | Annonces

### Call for Chapters: "Organizational neuroethics: Reflections on the contribution of neuroscience to management theories and business practice"

*Editors:* Joé T. Martineau (HEC Montréal) and Eric Racine (IRCM)

*Publisher:* Springer (within the book series *Advances in Neuroethics*)

*Featuring:* Contributions from Jean Decety, Peter Reiner, Diana Robertson, Charles Spence, and David Waldman, among others.

*In this edited volume, we wish to introduce, define and map a new "organizational neuroethics" as an emerging interdisciplinary field of research that reflects on the ethics of organizational neuroscience research and applications, as well as on the neuroscience of organizational ethics, drawing on the debates and reflections that have been taking place in the field of neuroethics in the past two decades. To our knowledge, this volume will be the first to engage scholars (and readers) on a variety of aspects related to (1) the ethics of organizational neuroscience research and applications, and (2) the neuroscience of organizational ethics. We are inviting multiple contributions for each of these two themes.*

*Inquiries and proposals should be submitted by email to Joé T. Martineau at [joe.trempe-martineau@hec.ca](mailto:joe.trempe-martineau@hec.ca).*

**Submission Deadline:** June 1, 2017

### Call for Applications: New Master's Program in STS, Munich Center for Technology in Society

*The Munich Center for Technology in Society (MCTS) of the TU Munich launched its new Master's program in Science and Technology Studies (STS) last year. It is an English language program and free of tuition fees (as are almost all degree programs in Germany). The application is now possible until May 31, 2017. From bio-technology to energy transitions, from automated mobility to data security - the big challenges of today's societies are inseparably connected to scientific, technical and social questions. The Master's program Science and Technology Studies will teach you how to reflexively research, develop problem-solving skills and critically intervene in the big sociotechnical issues of our time.*

**Application Deadline:** May 31, 2017
