Call for Applications: Florence Levy Kay Fellow in Philosophy and Neuroscience , Brandeis University

Brandeis University in Waltham, Massachusetts invites applications for a two-year, non-renewable Florence Levy Kay Fellowship in Philosophy and Neuroscience, beginning Fall 2018. The Kay Fellow will be appointed as a faculty member at the rank of lecturer with a joint appointment in Philosophy and Neuroscience.

The ideal applicant will have an educational background in philosophy and neuroscience, and a demonstrated ability to foster formal and informal conversations among philosophers, psychologists, and neuroscientists. The postdoctoral fellow will actively pursue his or her own research and teach one course per semester, including a course in Neuro-ethics, while participating in and contributing to the intellectual life of the Philosophy Department, Neuroscience Program and the Brandeis community. Applicants must have a Ph.D. in hand by the start of the fellowship.

The fellowship includes a salary of \$57,500, plus benefits, with moving expenses (around \$1,500), and a research fund of up to \$4,000 per year. Questions about the position may be directed to Julie Seeger at jseeger@brandeis.edu.

Submission deadline: January 15, 2018

[Click here for more information.](#)

Call for Applications: Assistant Professor, Department of Philosophy, California State University

Full-Time Tenure-Track Position as Assistant Professor, Beginning Fall 2018:

AOS: Ethics (in the areas of Health Sciences, Public Health Policy, and Medicine).

AOC: One or more of Science and Values, Values and Technology, Philosophy of Technology, Information Ethics, Philosophy and Public Policy.

Candidates must have a Ph.D. in Philosophy. ABD candidates will be considered. If ABD, candidates will be required to complete the doctoral degree by August 2018. Normal teaching duties include four courses per semester at the undergraduate level, primarily in the areas of specialization and competence. Candidates will be expected to have an active research program and are expected to demonstrate a commitment to teaching excellence in Philosophy. Candidates are required to have experience teaching, or demonstrated willingness to develop, online/hybrid courses..

Submission deadline: January 2

Call for Applications: Manager, Health Policy, Chan Zuckerberg Initiative, Palo Alto

The Chan Zuckerberg Initiative is dedicated to advancing human potential and promoting equal opportunity through technology, grantmaking, impact investing, policy, and advocacy work. We look for bold ideas – regardless of structure and stage – and help them scale by pairing world-class engineers with subject matter experts to build tools that accelerate the pace of social progress. The Health Policy Lead will work with members of the Policy and Science teams to guide the development of initiatives at the intersection of law and policy, technology, and biomedicine.

The Health Policy Lead will guide the development of initiatives at the intersection of law and policy, technology, and biomedicine. To begin, the person in this role will help us to explore opportunities to promote data sharing and support, and strengthen patient communities and partnerships. As part of our small team, this individual will have the opportunity to contribute to our broader science policy strategy in support of CZI's mission to cure, prevent, or manage all diseases by the end of the century.

Submission deadline: Not listed

Call for Papers: Brain Science, Philosophy, and Ethics in Medicine, Biomed Central

Series guest editors: Dr. James Giordano, Dr. John Shook

We invite to you to submit to our new article collection/thematic series: Brain science, philosophy, ethics, and medicine. This thematic series addresses the philosophical and ethical issues generated by progress in, and use of cutting-edge brain science in medicine. Herein, we conjoin prior and on-going work that focuses upon neuroethical concerns, and invite papers that provide and advance inquiry, insight, speculation and debate.

Supported by funding efforts such as the United States' Decade of the Brain (1990-2000) and current Brain Research through Advancing Innovative Neurotechnologies (BRAIN) initiative, and the European Union's Human Brain Project, neuroscience is forging new directions and resources to access and affect neurological structures and functions. These tools and techniques have enabled applications in medical fields of neurology, neurosurgery, psychiatry, rehabilitation, and pain care, both to treat disorders, and to modify cognition, emotions and behaviors. While such capabilities may be construed as beneficial, the discovery, development and use(s) of new devices, information and knowledge also incur ethical, legal and social issues; these are the focus of the relatively new, but ever more important, necessary and growing field of neuroethics.

The following journals are accepting submissions to the series:

Philosophy, Ethics, and Humanities in Medicine

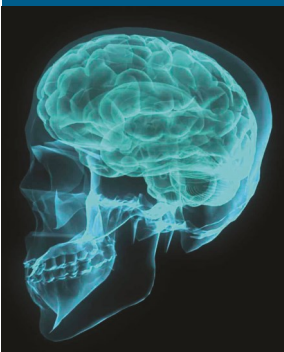

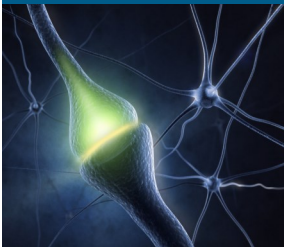

BMC Neuroscience

BMC Neurology

BMC Medicine

Submission Deadline: Not listed
